

Missioning of the Queen of Peace Region Leadership Team

Open to the Spirit, we serve our corporate mission by our willingness to share our giftedness. Our personal charisms of leadership validate the variety of gifts that are among us, enable us to take responsibility for the quality of our common life and empower our participation in discernment and decision making, so that the will of God is done in us and the wider community. (Constitutions 6.03)

In Jesus' time, he missioned his disciples to various places and assigned them with different ministries in fulfilling Jesus' mission on Earth. The tradition has continued over the past ages and as disciples of Jesus in our time we are called to this mission.

On the 1st November 2021, marked a new mission of another leadership team for the Queen of Peace Region. The missioning started with beautiful prayers and followed by the missioning where each member was presented with a candle and an icon of love. I am really grateful to the sisters who prepare the prayers and setting up the room at St Anne's Convent that everyone was visible to the screen. It was a delight to see all the sister's expressing happiness on this occasion and the active participation. This showed our connectedness. With the sisters in South Africa and the Congregational Leadership Team members in Australia and Korea via zoom enabled me to acknowledge our oneness. The sisters in Zimbabwe were all present physically and the spirit upon everyone was uplifting.

Being presented with the icon of love, motivated me that I felt entrusted by all the sisters in taking up this ministry for the coming years. "Live heart to heart with Jesus" the words inscribed on the icon challenged me to be more conscious of how I will be carrying out my tasks as leadership team member. Well, the profound phrase is calling me to depend completely on Jesus wholeheartedly since He is the one who has chosen me and to be always at the service of others through the gospel.
